

[Your Name]

Senior full-stack engineer in Berlin. I build reliable checkout and payment systems.

hello@yourname.dev yourname.dev github.com/yourname linkedin.com/in/yourname

Experience

Senior engineer, [Company]	2024 to present
Lead the checkout team of five. Shipped the one-page checkout that lifted mobile conversion from 2.1% to 2.6%.	
Author, idempotency-kit, open source	2021 to 2023
Wrote and released 1.0 of an idempotency middleware that now has 41,000 weekly downloads.	
Senior backend engineer, Tessellate Payments	2021 to 2024
Designed the double-entry ledger behind \$1.9 billion in payouts, with zero double payments.	
Full-stack engineer, Harbor & Lane	2019 to 2021
Rebuilt merchant reporting on ClickHouse and took p95 load time from 6.2 s to 0.9 s.	
Freelance payments engineer, Independent	2018 to 2019
Built Stripe and Adyen integrations for three independent shops, evenings and weekends.	
Software engineer, Brightloop Studio	2017 to 2019
Built storefronts for 20 retailers and the component library the studio still uses.	

Selected projects

One-page checkout, [Company], 2025
Rebuilt a five-step checkout as a single page and lifted mobile conversion from 2.1% to 2.6% across 1.4 million monthly sessions.
Exactly-once payout ledger, Tessellate Payments, 2023
Replaced nightly batch payouts with a double-entry ledger that has paid out \$1.9 billion without a single double payment.
Merchant reporting dashboard, Harbor & Lane, 2021
Cut the dashboard's p95 load time from 6.2 s to 0.9 s by moving reports onto pre-aggregated rollups.
idempotency-kit, Open source, 2021
An open-source idempotency-key middleware for Node APIs with 41,000 weekly downloads, adding 0.4 ms at p99.

Skills	Languages	Education
Next.js, TypeScript, Stripe, PostgreSQL, Go, Kafka, React, Node.js, ClickHouse, Redis	English, German	BSc Computer Science, University, 2017

Every page I ship loads in under a second on a mid-range Android phone.
